SUMMARY

Technology Analyst with 2+ years of experience in Application Support, Production Operations, Incident Management, and Release Coordination within enterprise telecom environments. Experienced in supporting mission-critical applications, troubleshooting production incidents, conducting Root Cause Analysis (RCA), coordinating deployments and version upgrades, and ensuring operational stability. Skilled in SQL, Unix/Linux, Windows servers, AWS console, API Testing, Jenkins, Change Management, Vulnerability Remediation, and cross-functional stakeholder collaboration. Proven ability to maintain high system availability while driving continuous process improvements and operational excellence.

TECHNICAL SKILLS

- Application Support & Production Operations
- SQL Query Development & Troubleshooting Unix/Linux Administration
- Incident & Major Incident Management
- Root Cause Analysis (RCA), Release, Problem & Change Management
- Jenkins Deployment Support, CI/CD, GitLab
- API Testing (Postman)
- Vulnerability Remediation & Compliance
- System Monitoring & Performance Analysis
- Stakeholder Communication
- Process Improvement & Automation Service Delivery Management
- ServiceNow (Exposure), Monitoring & Ticketing Tools Incident Management
- Major Incident Handling

TOOLS

SQL | Linux | Putty | AWS EC2 | ELK | Dynatrace | Gitlab | Jenkins | CI/CD | API | ServiceNow | Functional testing | Manual testing | UI testing | Postman | RCA | Troubleshooting and analysis.

EXPERIENCE

Packaged App Development Analyst

Feb 2024 - Present

Accenture India Private Limited

Project: Telecom Operations & Application Support. Responsible for supporting multiple business-critical applications involved in mobile order provisioning, billing operations, service order processing, and commission-related file generation.

- Deliver L1–L3 production support for telecom applications covering mobile order provisioning, fulfilment, and billing.
- Monitor application performance and ensure high availability of critical business services.
- Investigate, troubleshoot, and resolve production incidents of 400+ within SLA timelines.
- Handled Major Incident Management activities and coordinate with multiple support teams during critical outages.
- Perform detailed Root Cause Analysis (RCA) and implement preventive measures to reduce recurring issues.
- Assisted team members in basic troubleshooting, log analysis, and proactive issue identification.
- Execute SQL queries for data validation, troubleshooting, issue analysis, and operational reporting.
- Support Unix/Linux server operations and perform application-level troubleshooting.
- Coordinated 120+ application deployments and version upgrades using Jenkins.
- Participate in 200+ Change Management processes, including deployment planning, implementation, and post-release validation.
- Validate and test APIs using Postman for application troubleshooting and integration verification.
- Collaborate with development, infrastructure, database, and business teams to resolve production issues.

- Track, analyze, and remediate application vulnerabilities identified through security scans.
- Implement security fixes and coordinate deployment activities to ensure compliance requirements are met.
- Prepare operational documentation, incident reports, RCA documents, and knowledge-sharing materials.
- Contribute to process improvement initiatives to enhance system reliability and operational efficiency.
- Successfully assisted multiple critical telecom applications with minimal production downtime.
- Reduced recurring incidents through effective RCA and preventive action implementation.
- Coordinated successful deployments and application upgrades with zero major post-release issues.
- Improved operational efficiency through proactive monitoring with ELK and Dynatrace and issue resolution.

PROJECTS

Telecom Order Provisioning Application

- Supported customer mobile order provisioning workflows.
- Investigated order failures and performed data corrections using SQL.
- Ensured successful order processing and business continuity.

Billing File Transfer Application

- Managed application support for billing-related file transfers.
- Diagnosed file processing failures and server-side issues with sftp and Firewall related analysis.
- Worked with infrastructure teams to maintain operational stability.

Service Order Management Application

- Assisted service activation and order management processes.
- Performed incident troubleshooting analysis and deployment validation.

Commission File Generation Application

- Managed production support activities for commission processing.
- Validated data accuracy and investigated processing discrepancies.

EDUCATION

Narasaraopeta Engineering College

Bachelor of Technology (B.Tech)

2019-2023

CERTIFICATIONS & TRAININGS

- Oracle Cloud Infrastructure 2025 AI Foundations Associate – Oracle
- Oracle Fusion AI Agent Studio Certified Foundations Associate - Rel 1
- Deep Learning - [Coursera](#)

ADDITIONAL INFORMATION

- Strong analytical and problem-solving skills. - Experience working in fast-paced production environments. - Excellent communication and stakeholder management abilities. - Ability to work effectively in cross-functional and global teams. - Committed to continuous learning and operational excellence.
